

ASEAN Academy of Engineering & Technology

Guidelines for Nomination of Candidates for Fellowship

Fellowship of the Academy is awarded to eminent individuals from academia, research institutes, industry, and government who have demonstrated successful leadership or outstanding contributions to engineering and technology over an extended period.

Nomination statements may include, but of course not limited to, the following areas of achievement:

- (a) Academic Qualifications**
Academic qualifications in engineering and technology or other relevant areas accepted by the Council.
- (b) Professional qualifications & membership**
Professional qualifications and membership of relevant professional and scientific institutions or societies.
- (c) Research, innovative design & development**
Demonstrated achievement and recognition in research, development and innovation at national, regional and/or international level.
- (d) Recognised leadership in academia, research institutes, national and international professional bodies**
Academic and professional leadership in universities, research institutes, national and international academic and professional institutions and bodies.
- (e) Enhancement of the engineering and technology profession through public service.**
Contribution to the engineering and technology profession through active participation in various national and international boards, commissions and committees.
- (f) Entrepreneurship and management**
Successful creation, development and management of business and enterprises in engineering and technology.
- (g) Recognition by peers**
Recognised in the candidate's own profession within the country, ASEAN or internationally, as a leader in a particular discipline.
- (h) Recognition by the community**
Public recognition from contributions to the community, including being given awards and honours.
- (i) Value to the academy**
Potential contributions to the activities and enhancing the image of the Academy as evidenced by past performance in professional or scientific associations.
- (j) Personal knowledge**
Candidates shall be matured, responsible and respected individuals.
